

# Energy Portals and Earth Changes

Written by Ashok Kumara (Seattle, USA) on Jan 8, 2009

Energy portal, energy vortex or etheric portal refers to a region of space that has fifth dimensional vibratory frequencies. Inside this region, the third dimensional physical earth and fifth dimensional etheric earth merge into each other, creating a magical, heavenly place. Here are some examples of ancient energy portals: India - Himalayas and Arunachala, USA - Mouth Shasta (CA), Sedona (AZ), Taos (NM) and Glacier National Park (MT).

The physical and etheric planes of the earth have been separate for thousands of years. At the individual human level, this separation represents a broken link between the human mind (left brain) and the cosmic mind (right brain). The manifestation on the physical plane is a highly constricted ego resulting in the experience of fear, greed and aggression.

A few humans figured out how to activate their cosmic minds. They made use of the energy portals on the mountains, increased the vibratory frequency of their bodies, and ascended into the etheric plane. These beings are called ascended masters or *siddhas*.

We are now living in a very interesting time period of earth's life. The physical and etheric planes of the earth are merging into each other at a phenomenal rate. When the merger is complete, the earth will transform into a heavenly planet. The physical matter will still exist, but in a much higher vibration. At the individual human level, the human and cosmic minds will operate in harmony, with the cosmic mind directing the life. The manifestation would be an expanded ego resulting in the experience of freedom, harmony, abundance, love and joy.

The merger of physical and etheric planes is being orchestrated by a few hundred thousand awakened beings on the earth whose cosmic minds are in a highly activated state. These beings are called by different names: light workers, light bearers and light warriors. They are connected to one another through their cosmic minds. Their bodies are already vibrating at the frequencies of the new earth. Their joyful presence is naturally increasing the overall frequency of the physical plane and moving it closer to the etheric plane. They are acting as powerful magnets and collectively pulling the etheric plane down towards the physical plane, reducing the gap between the planes.

Due to the reduced gap between the planes, it is now possible to create energy portals in metro homes. The first step of creating an energy portal is energization. The quickest method of energizing a home is through celestial sounds. The second step is to connect the energized home to the etheric plane through a tube of golden light (created by the power of thought/visualization). Once the connection is established, the portal can be maintained by continued production of celestial sounds and by living with the principles of freedom, harmony, abundance, love and joy.

During the earth's merger process, the existing economic, political, educational, religious and spiritual systems based on fear and greed will crumble down, and new systems based on harmony and abundance will emerge. The best preparation for this transition is to activate the cosmic mind (right brain) and tune into the new ideas.
